

Issue:

If the course is copied from one course to another or imported from a package, sometimes for few courses the Course Menu will be black as below:

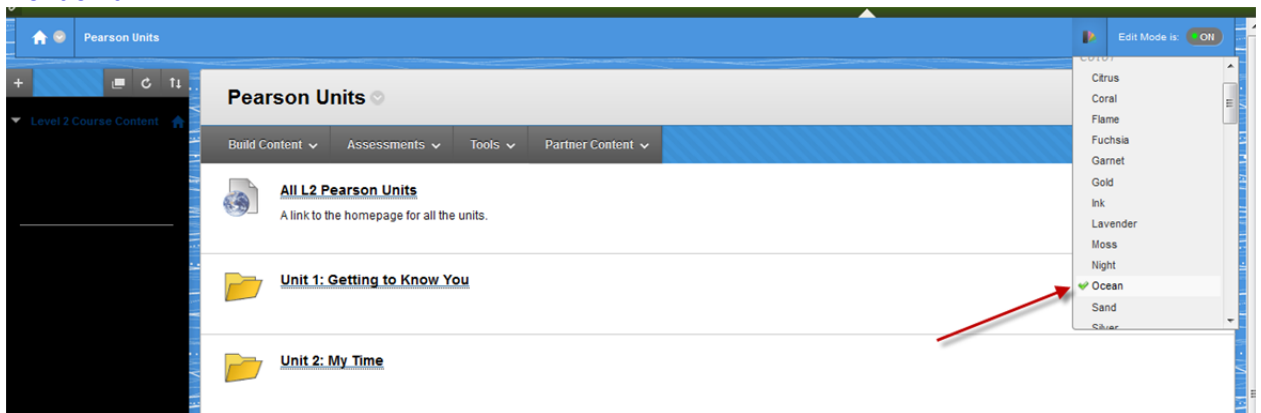

Solution:

You can fix this by re-applying the existing course theme again by following the below steps:

1. Login to BBlearn
2. Go into the course having issue.
3. Point the mouse on the “Change Course Theme” icon at the right top of the page.

4. You can see the list of themes , where the current selected theme will be having a green tick in front of it.

5. Just click it once, so that the theme will be re-applied.
6. Now the black menu will disappear.
